Final Homework Assignment for Math 4242, section 030

Due: Monday, December 8th.

All section references are to the Leon text.

Problems to hand in:
 Section 6.5 problem 6, 9
 Section 6.6 problems 1 c), 3 b), 8, 10, 13, 14
 Section 6.7 problems 6, 7, 9, 12

There won't be any assigned problems on chapters 7 and 9 but there are many worthwhile problems in these sections that can help you understand the material. For example, to help with the basic material in section 7.4, you might try problems 1 b) and c), 2, 4, 18 and 19.

Reading for remainder of term:
 For Wednesday December 3rd, section 6.7.
 For Friday December 5th, browse sections 7.1 through 7.3.
 For Monday December 8th, section 7.4.
 For Wednesday December 10th, chapter 9.

Notes on syllabus:
 We will not cover section 6.8. In chapter 7, the only section we will cover in detail is section 7.4. We will not cover chapter 8. If time allows, we will take a brief look at chapter 9.

Reminders:
 The third and final in-class test for this course will be held on Friday, December 12th. The test will cover chapter 6 through section 6.7 as well as section 7.4 and perhaps chapter 9. There will **not** be cumulative exam during the finals period.
